OWNERS COMMENTS

Kahu Kura was the last and most customised Piper 60 wide beam built. She was a full custom build for a very fastidious owner and specifically built to travel down the EU canals but is equally at home on the UK canal system. I am the second owner and purchased her from the commissioning owner.

The boat has been built to be fully self-sufficient with solar / large inverter charger and a 3.5kva whisper genset all fully networked / controlled with remote starts from the interior monitoring panel. She has very low engine /gen set hours and is suitable for a buyer looking for a new build as she presents as new.

The interior layout features a huge custom galley with all Corian counters and an Aga heritage range providing heating through radiators throughout the entire boat (wireless controlled) and hot water as well as two ovens and two hot plates, hot water can also be provided by the gen set (or shore power) or the main engine .

There are built-in full-size Miele washer / dryer and a full size Miele dish washer + custom stainless fridge and freezer and Corian custom work tops to the sink area.

The open plan saloon has an office area and full size L shaped 3 seater sofa and a custom 3 sided contemporary wood burner. New custom made blinds have just been fitted to the entire boat and the boat is offered full furnished ready to move onboard including all new mattresses / linen + custom lighting etc etc

Forward of the saloon there is a queen sized guest cabin then separate family bathroom with bath / shower/ washbasin and toilet and forward of those is a king sized owners cabin with an en-suite shower room / toilet / wash basin and shower . All bathrooms have slate tiles and underfloor electric heating and custom Corian basins and electric toilets + heated stainless radiators and towel rails.

The fit out of the interior of the boat and space planning is quite possibly the best I've ever seen including the new Piper Dutch barges and she was built at no expense spared with a Superyacht finished Alcraft paint system on the exterior and to many extras to list here such as satellite systems and cameras, systems monitoring and the systems are controlled via Alexa from remote via smart phone when you are off the boat if needed ! Both forward and aft cockpits have full enclosures and a new aft cockpit enclosure is on order.

BOWCREST MARINE COMMENTS

A unique and rare opportunity to acquire a highly individual custom built and beautifully presented vessel which is ready to go. Built with no expense spared this superb barge is capable of extended cruising/living aboard and is certainly one for the discerning purchaser. Her big advantage is that she was built to extensively cruise the waterways of Europe in absolute comfort but because of her super dimension is perfectly capable of cruising the extensive UK Widebeam Canal System bringing such as the Kennet & Avon into possibility. With her Spec. she is certainly one of the very best available.

HIGHLY RECOMMENDED.
